Regular Values to 3.50

1.00 and 1.50**50 FIREMEN FALL UNCONSCIOUS IN CHEMICAL FUMES**

Chief Kenlon Thrice Overcome, Twenty Others Sent to Quarters.

6 DOCTORS KEPT BUSY.

Blaze in Can Factory, Starting at 11 o'Clock, Burns Rest of Night.

Fifty firemen were made unconscious, twenty so severely overcome that physicians ordered them back to their quarters, one was injured internally and every man of fourteen engine companies and four truck companies was severely affected in a chemical fire that gave the department its hardest fight in many years during six hours of the fiercest kind of struggle between 11 o'clock last night and 5 o'clock to-day at the building covering a block on Greenwich street, between Desbrosses and Watt streets.

The half of the building affected by the blaze is occupied on the ground floor by the Barnard-Greenwood Company, which deals in gas pipe and fittings. The chemicals were stored in the five upper stories, occupied by the Atlantic Can Company.

Traffic on the Ninth avenue "L" and the many surface lines passing this point was entirely suspended until 5.30. Passengers on an "L" train were removed by the police, after a woman and child became so hysterical as to require a physician's services.

STREETS RESEMBLE BATTLE-FIELD AS PHYSICIANS WORK.

For six hours the streets surrounding the building resembled a battle-field hospital. Ten physicians were working hard, and firemen dropped like flies each time a veer in the wind sent the heavy smoke from muriatic and hydrochloric acid into the street. The fumes not only caused unconsciousness but also nauseated those firemen who escaped their full effect, as well as partly paralyzing the respiratory tracts and causing dizziness. Time after time whole companies were driven back, with half of the number carrying those stricken by the chlorine gas.

Fire Chief Kenlon, after having been twice revived by physicians, dropped a third time at 4 o'clock this morning. Dr. Arthur of the Fire Department, found then that his condition demanded immediate care, and Kenlon was taken to the Great Jones street station, where it was later said he was gradually recovering. Dennis Cronin of Hook and Ladder Company No. 13 was on the fifth floor of an extension when the fumes overcame him. He dropped to the fourth floor and was taken to Hudson Street Hospital, suffering from a strained back and internal injuries.

Drs. Banta, Tierney, Altser and Arthur of the Fire Department, and Drs. Corey and Blanchard of the Hudson Street Hospital remained on the

scene throughout the morning, aiding the firemen as the unconscious men were carried out from the smoke by their stronger comrades. FIREMEN OVERCOME, DRAGGED OUT BY ROPES.

On the roof the firemen found the smoke as thick as below. So dense was it that Deputy Chief Worth ordered them to tie ropes about their waists before venturing to the skylights. A fireman held each rope as his comrade went into the curling clouds.

Fifteen firemen were dragged out unconscious before the skylights and scuttles were ripped open, and a great volume of intensely black, acrid smoke spread across the roof, dropping a dozen men as the openings were made. It was with difficulty that Worth reached all his men.

Among the firemen who were rendered unfit for further duty were Chief Kenlon, Lieut. Ross of Engine Company No. 7, Capt. Spencer of Engine Company No. 24, Battalion Chief Kus of the First Battalion, Capt. McDermott of Engine Company No. 13, and Capt. McKenna of Engine Company No. 33.

FORTY PASSENGERS ARE TRAPPED IN "L" TRAIN.

An "L" train which had stopped south of the Desbrosses street station held twenty men and as many women, who were afraid to retreat to the next station south for fear of the third rail, and were equally unable to go through the smoke to the Desbrosses street station.

Capt. Burke and Lieut. Wilson of the Beech street station walked along the tracks from the Franklin street station and escorted thirty-eight of the forty back to safety. When they returned to the train, however, they found Mrs. Gustie Golden and her three-year-old son Lewis on No. 231 West Sixty-seventh street in hysterics.

Shortly after 6 o'clock the flames began to subside, but the volumes of smoke, laden with chlorine fumes, continued as great as ever.

Viaduct Suicide Identified.

The body of the man who jumped from the viaduct at One Hundred and Fifty-fifth street and Eighth avenue on May 14 was to-day identified as that of Henry Stetser, twenty-five years old, a clerk of No. 850 Wilham street, Bridgeport, Conn. A cousin, Fred L. Healey, of No. 444 Catherine street, Bridgeport, said Stetser had been ill and had left home late on May 13 to come to New York to see a ball game. He committed suicide near the Polo Grounds in sight of many people going to a game.

ONLY THE WELL ARE HAPPY

Science insists that the large intestine must act as the main drain of the system. Use R & G Pills and start right. They relieve Constipation, purify the blood, clear the skin, stop headaches, dizziness, belching, flatulence, torpid liver.

SKULL SMASHED IN A RACE, BUT HE LIVES

Jockey Madden Returns From South America After a Nip and Tuck Death Struggle.

Jockey Charlie Madden came back from South America to-day on the United Fruit liner Calamaries. He has been riding in Argentina and Chili the last two years.

In July, 1912, he was riding in Valparaiso, Chili. His mount was in the lead coming down the stretch when a Spanish rider suddenly shot his horse to the fore and across his path. Madden and his horse went to the ground. Three times they rolled over on the track, then the animal lay dead. Madden was picked up unconscious, his skull broken from his left temple to the crown of his head.

The jockey was taken to a Spanish hospital. He was laid on a couch and the doctors said he couldn't live. They didn't pay any attention to him.

This rice has all the nourishment nature gave it.

It contains all its original bone and muscle building elements. None of its nutritive qualities have been scoured off.

You will like it even better than the ordinary polished kind.

Look for this package at your grocer's.

Comet NATURAL BROWN RICE

If your grocer hasn't yet secured it, send his name to Grover C. Connel, 100 Hudson st., N. Y. C., Representative Sales Agent, Seaboard Rice Milling Co., Galveston, Tex.

Drink Yuban Coffee and see how full flavored it is. Note what a wonderful color it has.

Next morning they were surprised to find him alive.

Madden's American friends got him into another hospital, where the doctors said that there was one chance in a thousand that an operation would save him. His friends told them to take the chance. For forty days Madden lay in the hospital and then gradually recovered. He lives at No. 423 Prospect place, Brooklyn.

MILITANT EDITOR HELD.

Publisher of Suffragette Newspaper to Be Tried in Old Bailey.

LONDON, May 19.—Sydney Drew, printer and publisher of the Suffragette, the newspaper representing the militant section, was committed by the Magistrate at Bow Street Police Court to-day for trial at the Old Bailey, the specific ground of complaint against him being an article inciting members of the Women's Social and Political Union to commit malicious damage to property.

An official of the post-office testified that 237 letter boxes had been tampered with, 4,000 letters damaged and 114 pieces of mail destroyed by the suffragettes.

FEEL HEADACHY, DIZZY, BILIOUS? CLEAN YOUR LIVER!—A DIME A BOX

Sick headaches: Always trace them to a lazy liver; delayed, fermenting food in the bowels or a sick stomach. Poisonous, constipated matter, gases and bile generated in the bowels, instead of being carried out of the system, is reabsorbed into the blood. When this poison reaches the delicate brain tissue it causes congestion and that dull, sickening headache. Cascarets will remove the cause by stimulating the liver, making the bile and constipation poison move on and out of the bowels. One taken to-night straightens you out by morning—a 10-cent box will keep your head clear, stomach sweet, liver and bowels regular, and make you feel bright and cheerful for months. Children need Cascarets, too.

Lindeman-Angelus Player-Piano, \$585

IT IS EXPECTED of this Piano Store that it should do bigger things than have been done in the piano trade, else it would have no place in the broad scheme of things that govern the whole Wanamaker business.

It is none the less an achievement and service to be able to offer the LINDEMAN & SONS PIANO, which has been before the public for three-quarters of a century, coupled with the finest and most human player-piano device—the ANGELUS—in the LINDEMAN-ANGELUS, for \$585.

There is something very human about piano reputations. They are not made in a day. That is why we prefer to offer only those piano names that have earned the right through merit and well-doing to associate together on one floor.

Such a player-piano is the LINDEMAN-ANGELUS.

You will not find anything elsewhere at anywhere near the price—\$585—that will match it in VALUE, REPUTATION, TONE, DURABILITY and PLEASURE-GIVING SERVICE.

The LINDEMAN-ANGELUS is sold for cash at \$585.

If time is desired, only simple banking interest, for such time as is taken, is charged for the accommodation; and your old piano, if you have one will be taken in part exchange at its full current market value.

Piano Sales, First Gallery, New Building.

Grace Has Become Something A Woman May Purchase

Yet it is something which women of moderate means can afford to buy as well as women of great wealth.

For grace—the greatest of all charms—depends on the corset. Not on how much you pay for your corset, either—but on what kind of corset you wear.

If You Wear a Parisienne Corset you have bought the greatest amount of beauty and grace possible at no matter what price.

Parisienne corsets are priced \$5 to \$35. They are made exclusively for the Wanamaker Store.

In our Corset Salons are expert fitters who will insure your getting the right Parisienne models.

Parisienne Corsets Are the Best of American Made Corsets**Special for Wednesday**

All excellent value for women desiring light cool, comfortable corset.

Don't Help Make Junk of Your Car

Don't let that fatal jinx of the automobile—Friction—out short the useful days of your car. Remember the moral of the ounce of prevention—get to friction before friction gets to your car. This is the answer—proper lubrication!

Dixon's Graphite Lubricants are the absolute remedy for friction ills, because graphite goes straight to the cause of friction, gets right down to the minute holes and microscopic snags that exist in the most highly polished bearings. Oil or grease only puts a thin film over this roughness. Pressure squeezes out the oil. Heat turns it thin. But Dixon's selected flake graphite completely fills up the tiny holes, smooths over the roughness, makes a hard, oily, veneer-like surface that completely eliminates the grinding of the microscopic rasp. Try out a can of

DIXON'S Graphite Grease 677 For Transmissions and Differentials

and you'll quickly learn why winning speed kings, experienced road drivers, and men who drive simply for pleasure, use only Dixon Lubricants. Broken springs, burned-out bearings, broken gears, never bother the Dixon-lubricated car. Heat we cold won't affect graphite. Pressure makes the graphite-lubricated surface smoother. The more it is used, the finer finish it develops. And Dixon's selected flake graphite is the only graphite that will not pack or ball up, because this peculiar form of graphite will not adhere to itself.

It's economical, too. Of course, its price is more than for ordinary grease, but compare your repair charges after six months' use of Dixon Lubricants. Then figure out your depreciation charges. You'll never use any other lubricant after that.

Dixon's Selected Flake Graphite always remains a thin, unctuous, flat flake under all conditions. It always slides, slides over itself. It is the only graphite produced that will not adhere to itself and ball up and pack.
